

Atelier

Web based platform providing fast and convenient access to digital archives.

Fully Cloud Hosted

Atelier is a web based platform providing fast and convenient access to digital archives wherever you have an internet connection. Fully cloud hosted, any digital data set can be loaded together with associated metadata to create an easy to use digital resource. The system can be integrated with your website to provide extra value to your organisations stakeholders wherever they may be located. Cutting edge indexing provides lightening fast search function within text based content, while tagging enables users to build information about images while browsing.

User-Friendly Features

Easy-to-use digital archive system with custom branding

Fast, advanced search across photos, scans, PDFs, and articles

Simple metadata import for efficient organisation

Scalable storage — from small collections to large archives

Seamless integration with your existing website

Compliance and standards

The system is hosted in an ISO27001 compliant data centre. The code was developed in alignment with OWASP security best practices.
